

Ontology

Dualism

- An honest attempt to solve the Mind-Reality Continuum which cannot be explained by the Indic Bhava-Pratyay Punctuator based Ontology.
- I conjecture that instead of a singular 'World', dual Mind & Body Worlds exist with mutually disjoint Ontologies which can only influence their own worlds exclusively.
- The proposed design solves the Continuum problem as the links in the Monal space causing ambiguity in Attribution are now separable in the Dual Mind-Body space.
- Hence, assuming the Descartes theory, I propose Dual Ontologies having vast implications

MIND

BODY

Dualism in Ontological Space
